

Building Management

We make it easy to collect data from Your buildings

We offer everything that's required to build services and applications to collect data from wireless sensors. DTs product powers data collection for start-ups, scale-ups, Fortune 500 companies, and everything in between.

SENSOR TYPES

Temperature

Sends a new temperature reading every 15 mins.

Humidity

Reads relative humidity and temp every 15 mins.

Touch

Sends an event whenever it is touched.

Water

Reports the presence of water on the sensor.

Desk Occupancy

Detects if a desk is occupied or available.

Proximity

Triggers when something is within a 5 mm range.

CO2

Measures temperature, humidity and CO2 levels.

Motion

Detects presence of people in a room.

We make data collection simple

Connect

SOLUTION OVERVIEW

ENVIROMENTAL MONITORING

Keep track of key environmental factors that affect people's health and productivity.

Install in Minutes | Long Wireless Range | Long Battery Life

Ambient Temperature
Temperature sensor on the wall in a room.

Indoor CO₂
CO₂ sensor on the wall, ideally 1m from doors, windows & vents, around breathing height.

Relative Humidity
Humidity sensor on the wall in a room.

SPACE OCCUPANCY

Understand how and when a building is used. Save costs by downsizing unnecessary spaces and optimizing HVAC, heating, and cooling based on how the building is used.

Tiny Discrete Wireless Sensors | Low Maintenance Cost | Scalable

Door Activity

Proximity sensor in door frame (range will be reduced on metal).

Room Occupancy

Motion sensor mounted on ceiling.

Desk Occupancy

Desk occupancy sensor placed under desk and tables, as close as possible to the edge (2-4 cm) where each person will sit.

PROPERTY DAMAGE PROTECTION

Immediately detect temperature anomalies and prevent expensive mold and water damage with 24/7 monitoring.

**Long Battery Life | 24/7 System Monitoring | Robust IP68 Rated |
Low Maintenance Cost | Accurate Data**

Water Leakage Detection

Water sensor placed on floor, wall or location where leak will occur. Not ideal in environments that create condensation.

Temperature Monitoring

Temperature sensor placed on critical assets and in data centres and server rooms.

Humidity Monitoring

Humidity sensor placed on or in wall, vent or location where humidity is a concern.

FEEDBACK & SERVICE

Customize buttons and notifications to easily receive feedback and service requests.

Easy to Integrate | Tiny and Sleek | Easy to Customize

Customized Feedback Buttons

Tactile touch sensors placed in areas or on devices where feedback is important.

Partner solutions powered by

Sharing our principles for high quality products and impeccable service, our partners are constantly innovating and finding solutions for more efficient and sustainable operations. Partners are an important extension of our family and critical to our success.

Selected Applications

- Smart cleaning
- Workplace health & wellbeing
- Energy efficiency & sustainability
- Feedback & service
- Building Occupancy
- Legionella Compliance
- Remote Monitoring
