

# Cold Chain Monitoring

## Fridge Monitoring & Predictive Maintenance

The Industrial Smart Fridge Monitoring Solution transforms how you monitor the perishable goods supply chain. By receiving accurate, real-time data regarding temperature, humidity, current and door status of refrigerators and freezers customers have been given the technology which allows them to take swift action, prevent losses and maximise profit.

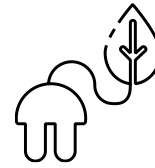

# FRIDGE MONITORING

The solution transforms the monitoring of the perishable goods supply chain by receiving accurate, real-time data regarding temperature, humidity, current and door status of refrigerators and freezers, customers are empowered to take swift action, prevent losses and ultimately maximise profit.

## High level overview

- All IoT gateways connected via GSM to cloud
- SIM embedded in every fridge monitoring device
- Easy to implement all inclusive monthly service contract
- Scalable across multiple clients and industries

## VALUE DRIVERS

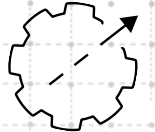

Energy efficiency

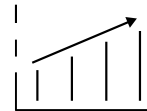

Centralised monitoring  
& control

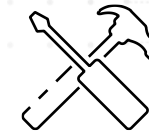

Food safety &  
automated regulatory  
compliance

Workforce  
management

Maximum utilisation of  
capacity & assets

Asset management  
& preventative  
maintenance

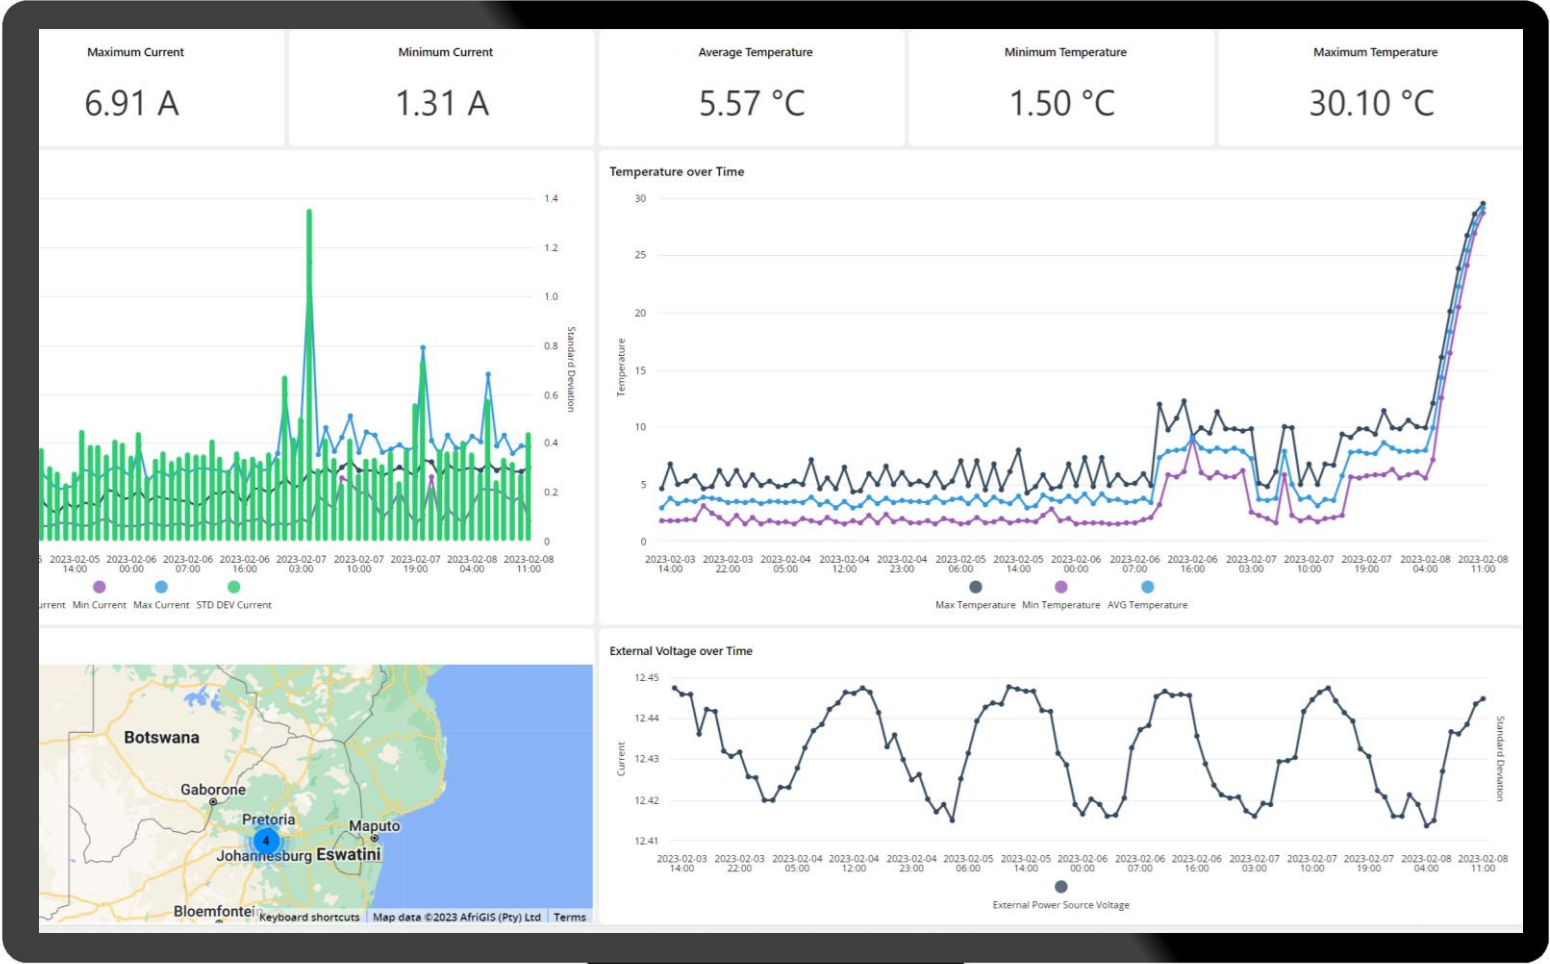

Pro-active temperature &  
humidity monitoring
